FOR GROWN-UPS

What this sheet practices

- A flat is 100: ten rods side by side.
- 3 hundreds, 4 tens and 5 ones make 345.
- 2 hundreds, 6 tens and 8 ones make 268.

REMEMBER IT

Count the flats, then the rods, then the ones.

How to help

- Use money: 100, 10 and 1 coins or notes are hundreds, tens and ones. Build a number, then add ten and see what changes.
- Do the lesson in the app first, then the sheet. Check it together with the answer key, and count out any answer that slipped with real things: buttons, pasta, fingers.
- The code 1234 is on the sheet and on its answer key, so the two pair up. New version deals new numbers.
