FOR GROWN-UPS

What this sheet practices

- Think: 8 times what makes 56?
- 8 × 7 = 56, so 56 ÷ 8 = 7.
- Think: 6 times what makes 42?

$6 \times 7 = 42$ $7 \times 6 = 42$

$42 \div 6 = 7$ $42 \div 7 = 6$

REMEMBER IT

To divide, think times.

How to help

- Share out things that don't go evenly. What's left on the table is the leftover, and it's always fewer than the number of plates.
- Do the lesson in the app first, then the sheet. Check it together with the answer key, and count out any answer that slipped with real things: buttons, pasta, fingers.
- The code 1234 is on the sheet and on its answer key, so the two pair up. New version deals new numbers.
